FEES. Intermediate Fixed Income Fee Schedule: .35% on the first \$25 million, .25% on the next \$75 million, .20% on amounts over \$100 million.

OTHER NOTES. Results for the full historical period are time weighted. Accounts have been valued daily and portfolio returns have been weighted by using beginning-of-month market values plus daily weighted cash flow. The dispersion calculation is based on a dollar-weighted average of portfolios within the composite for the entire period. The dispersion percent of N/A indicates that the number of portfolios for the entire year were equal to five or fewer or periods of less than one year. The benchmark source is FactSet. The valuation source is Intercontinental Exchange (ICE) through Advent Software along with Matrix Pricing Module. Benchmark returns are not covered by the report of independent verifiers.

DISCLOSURES (CONT.)

COMPOSITE NOTES. The composite for each investment strategy has specific criteria in terms of minimum portfolio size, tax status, and discretion. Portfolios meeting the stated criteria are added to the composite as of the first full quarter of investment in that composite's style. Similarly, accounts are removed from the composite after the last full quarter of management under the composite style. A complete list and descriptions of composites is available upon request. The composite results portrayed reflect the reinvestment of dividends, capital gains, and other earnings when appropriate. A complete list and description of composites is available upon request.

CALCULATION METHODOLOGY. The composite performance results are time-weighted total returns net of commissions and transaction costs. Valuations and returns are expressed in U.S. dollars. Vaughan Nelson consistently values all portfolios each month on a trade date basis. Additional information regarding policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. No composite accounts hold foreign denominated securities. Net-of-fee returns are calculated utilizing the highest annual fee paid by a client in the strategy. This fee is divided by 12 and subtracted from the gross composite return on a monthly basis to calculate monthly net of fee returns. Quarterly and annual net-of-fee returns are calculated by geometrically linking these monthly returns.
